Microdermabrasion Treatments

Microdermabrasion treatment can help reduce or eliminate the wrinkles and fine lines, "crow's feet," age spots, light acne scars, and undesired pigmentation that may appear on the skin over time. Microdermabrasion is a non-chemical, non-invasive procedure that uses a spray of microcrystals to remove the outermost layer of dry, dead skin cells and reveal younger, healthier-looking skin.

Microdermabrasion also encourages the production of a new underlying layer of skin cells with higher levels of collagen and elastin, which further improves your skin's appearance.

30-45 minute session: \$75 - \$110

Neck and Decollete Micro Enhancement: \$35

Facial + Microdermabrasion: \$125
